PROFILE SUMMARY

AI-Enabled Site Reliability, DevOps, and Platform Engineer with **15+ years** delivering zero-downtime, enterprise-grade platforms for Commonwealth Bank of Australia (CommBiz), FIS Global, and Eurofins across Banking, Financial Services, E-commerce, Insurance, and Information Storage domains. Currently owning end-to-end production reliability for CommBiz — CBA's flagship business banking platform serving 500,000+ customers — including blue-green release engineering via Octopus Deploy & ACDC, AWS cloud operations (EC2, Route 53, Auto Scaling, Akamai CDN/WAF), full-stack observability with Splunk & AppDynamics, and P1/P2 incident war-room leadership under ITIL V4 governance and ServiceNow change control. Deep expertise in multi-cloud infrastructure (AWS & Azure), Kubernetes (AKS & EKS), Docker containerisation, microservices, IaC (Terraform, CloudFormation, Bicep, Chef), CI/CD pipelines (GitHub Actions, Jenkins), and intelligent monitoring (Splunk, Dynatrace, Grafana, Prometheus, CloudWatch, SolarWinds, Datadog). Proficient in PowerShell, Python, Bash, and Windows Server / IIS / Active Directory / F5 BIG-IP / VMware environments. An early AI adopter integrating **GitHub Copilot, Claude Code, Roo Code, Cline, and ChatGPT** into engineering workflows. Certified: **AWS Solutions Architect · Azure Administrator (AZ-104) · ITIL V4 Foundation**.

PROFESSIONAL EXPERIENCE

SRE, DevOps & Platform Engineer

JAN 2022 – PRESENT

**Commonwealth Bank of Australia —
CommBiz Platform (IT Operations Senior
Analyst)**

Banking

CBA

CommBiz

500K+ Business Customers

AWS

Akamai

- Own end-to-end production release management for CommBiz (CBA's flagship business banking platform) using **Octopus Deploy** and **ACDC** — blue-green deployments, controlled rollouts, automated smoke tests, auto-rollback, and **ServiceNow** change-gate governance ensuring zero-downtime for 500K+ business customers.
- Drive **AWS cloud operations** and infrastructure reliability — EC2, S3, Route 53 DNS failover, Auto Scaling groups, and **Akamai CDN/WAF** configuration — maintaining multi-region availability and executing DR strategies for mission-critical banking workloads.
- Architect and maintain **Splunk** observability platform: custom SPL dashboards, log analytics, correlated alerting, and SLI/SLO metrics — reducing MTTD by ~40% and enabling proactive detection of payment processing anomalies before customer impact.
- Deploy and manage **AppDynamics APM** across application tiers — transaction flow mapping, business transaction baselining, and intelligent anomaly detection for real-time performance governance of banking services.
- Lead **P1/P2 incident war rooms**: rapid triage, coordinated service restoration, stakeholder communications, structured RCA, and post-incident reviews — reducing repeat incidents by ~30% through ITIL V4 problem management discipline and KB article authoring.
- Deliver **SSL/TLS certificate lifecycle management** and critical vulnerability remediation across 50+ production endpoints; manage Akamai WAF rule changes under strict change control with security and networking teams.
- Develop **PowerShell and Python automation** for runbook execution, self-healing workflows, deployment validation, compliance reporting, and patching cycles — saving 15+ engineering hours per release cycle.
- Integrate **GitHub Copilot and Claude Code** into SRE workflows for AI-assisted IaC generation, log pattern analysis, PowerShell script authoring, and incident diagnostics — accelerating team toil reduction.

EXPERIENCE

CONTINUED FROM PAGE 1

KEY ACHIEVEMENTS

- **Star of the Month — CBA:** Recognised for outstanding ownership, zero-downtime delivery, and proactive SRE practices on CommBiz.
- **MTTD –40%:** Built Splunk observability stack with correlated dashboards and intelligent alerting across CommBiz payment flows.
- **Repeat Incidents –30%:** Structured RCA, ITIL V4 problem management, and preventive action programmes at CBA.
- **15+ Hrs Saved/Release:** Automated SSL renewals, deployment validation, and patching workflows using PowerShell and Python.
- **Zero-Downtime Releases:** Blue-green pipelines with auto-rollback and smoke-test gates — eliminating unplanned outages.
- **AI Adoption Pioneer:** Integrated GitHub Copilot, Claude Code, Roo Code, Cline, and ChatGPT into SRE workflows.

DAY-TO-DAY ACTIVITIES

Blue-Green Releases	Octopus / ACDC
P1/P2 War Rooms	Splunk Dashboards
AppDynamics APM	ServiceNow Changes
RCA & Post-Mortems	SSL & Vuln Mgmt
AWS Cloud Ops	PowerShell / Python
Runbook Automation	GitHub Copilot / AI

CLIENTS & EMPLOYERS

Commonwealth Bank	FIS Global
Eurofins	Iron Mountain
J.P. Morgan (via FIS)	IMFS

PROFESSIONAL EXPERIENCE (CONTINUED)

Service Delivery Analyst / SRE

AUG 2021 – DEC 2021

 **FIS Global — Express SRO Global Payments Platform (USA)**

Financial Services

FIS Global

130+ Countries

Azure

Dynatrace

- Deployed and operated multi-tier applications across **Microsoft Azure** cloud environments — Azure VMs, App Services, load balancers, and **SQL Server** databases — supporting global ATM, POS, and online payment-gateway processing at millions of transactions per hour across 130+ countries.
- Engineered intelligent monitoring using **Azure Monitor and Dynatrace** — custom dashboards, distributed tracing, anomaly detection alerts, and correlated log queries surfacing failed and fraudulent transaction patterns before business impact.
- Managed **P1/P2 incident response** under strict financial SLAs: rapid triage, deep SQL Server query analysis, DB job monitoring, fraud transaction investigation, and coordinated service restoration across distributed payment systems.
- Authored incident runbooks, KB articles, and escalation playbooks standardising response procedures and reducing MTTR for recurring payment gateway failures.

Senior Product Specialist / SRE

SEP 2018 – AUG 2021

 **Eurofins IT Solutions — EOL & OSO Platforms (USA)**

E-commerce

Eurofins

50 Countries

IIS

Jenkins

Azure

- Managed full-stack application hosting on **IIS and IBM WebSphere** across dev, staging, and production — enforcing environment parity, configuration standards, and IIS application pool health for 99.9% SLA across 50 countries.
- Executed controlled production deployments using **Jenkins CI, Chef** configuration management, and **Octopus Deploy** — environment-specific config injection, pre/post-deployment smoke tests, and rollback procedures.
- Provisioned and maintained **Azure VMs, load balancers, and MySQL databases**; authored PowerShell automation for IIS configuration, server patching, and operational compliance tasks; managed Active Directory and Windows Server infrastructure.
- Performed SSL certificate management, security hardening, and infrastructure setup for new regional PSC application deployments — supporting 24×7 global laboratory operations and field-facing sample collection platforms.

System Engineer — Application Management

FEB 2016 – SEP 2018

 **Iron Mountain — Hosted Accutrac & GroupTrak GTx (USA)**

Information Storage

Iron Mountain

Windows Server

IIS

SQL Server

- Provided 24×7 application support for IIS-hosted Hosted Accutrac (order management) and GroupTrak GTx (marketing fulfilment) platforms — handling incidents, change requests, and service restorations under ITSM governance for global enterprise storage customers.
- Managed **Windows Server, IIS, and SQL Server** infrastructure — deployments, application tier configuration, DB job monitoring, and scheduled task management across production and DR environments.
- Coordinated structured troubleshooting, root cause analysis, and KB article authoring for recurring issues — building a reusable knowledge base that reduced repeat incident resolution time across multi-tier hosted applications.

- E-commerce & Laboratory Services
- Insurance & Utilities
- Information Storage & Data Mgmt

CORE SKILLS

CLOUD PLATFORMS

- AWS (EC2, S3, Route 53)
- Auto Scaling & CloudWatch
- Microsoft Azure (VMs, AKS)
- Azure Monitor & AD
- Multi-Cloud Ops & DR
- Cloud Migration & IaaS/PaaS

CI/CD & RELEASE ENGINEERING

- Octopus Deploy & ACDC
- GitHub Actions & Jenkins
- Blue-Green Deployments
- Auto Rollback Pipelines
- Smoke & Regression Testing
- Playwright (Test Automation)

SRE & RELIABILITY

- SLO / SLI / SLA & Error Budgets
- P1/P2 Incident War Rooms
- Root Cause Analysis (RCA)
- Change & Problem Management
- DR & Resiliency Testing
- Zero-Downtime Operations

OBSERVABILITY & MONITORING

- Splunk (SPL Dashboards)
- AppDynamics APM
- Dynatrace & Datadog
- Grafana & Prometheus
- CloudWatch & SolarWinds
- Oberv · Metrics · Logs · Traces

CONTAINERS & KUBERNETES

- Docker & Containerisation
- Kubernetes (AKS & EKS)
- Cluster Administration
- Microservices Architecture
- Cloud-Native Deployments

IAC & AUTOMATION

- Terraform & CloudFormation
- Bicep & Chef
- PowerShell & Python
- Runbook & Self-Heal Automation
- Bash / YAML / JSON

PLATFORM, NETWORK & DB

- IIS · Windows Server · AD
- F5 BIG-IP & Akamai CDN/WAF
- Load Balancing & VMware
- SQL Server · MySQL · Oracle
- IBM WebSphere

ITSM & GOVERNANCE

- ServiceNow & Jira
- BMC Remedy & Assyst
- SSL / TLS Cert Lifecycle
- Vulnerability Remediation
- KB Articles & Runbooks
- ITIL V4 Framework

AI TOOLS & ADOPTION

- GitHub Copilot
- Claude Code & Roo Code
- Cline & ChatGPT
- VS Code + AI Extensions
- AI-Driven IaC & Diagnostics

PROFESSIONAL TIMELINE

15+ years across Banking, Financial Services, E-commerce & Information Storage — building, automating, and owning zero-downtime enterprise platforms.

AWARDS

★ Star of the Month — CBA

Recognised for outstanding ownership, zero-downtime delivery, and proactive SRE practices on CommBiz — CBA's flagship business banking platform serving 500K+ customers.

★ MTTD Reduced ~40%

Architected Splunk observability stack with correlated dashboards and intelligent alerting, enabling proactive detection of payment processing anomalies across CommBiz.

★ Zero-Downtime Release Pipeline

Architected blue-green deployment pipelines with auto-rollback, smoke-test gates, and ServiceNow change governance — eliminating unplanned outages during production releases.

★ Repeat Incidents Reduced ~30%

Drove structured RCA, ITIL V4 problem management, preventive action programmes, and KB documentation that measurably reduced repeat production incidents at CBA.

★ 15+ Hours Saved Per Release

Developed PowerShell and Python automation for SSL renewals, deployment validation, compliance checks, and patching workflows — significantly reducing toil per release cycle.

★ AI Adoption Pioneer

First on team to integrate GitHub Copilot, Claude Code, Roo Code, Cline, and ChatGPT into SRE and IaC workflows — accelerating engineering velocity and improving code quality.
